Family Violence in Wyandot County

These data describe common types of violence perpetrated by family members or caregivers in our county each year. We present the best available, most recent estimates. Nonetheless, our figures are conservative and represent only part of the burden family violence places on our families and communities. All figures are estimates or annual averages.

Each year in our county...

children are abused or 70 - 110neglected

> reports of abuse or **198** neglect are filed with children's services

children are placed in custody

adults are physically abused 170 - 230 by a current or former intimate partner

> people are arrested for intimate partner violence

people file petitions for civil protection orders

adults seek shelter in **0** domestic violence shelters in the county

seniors in the community are 210 - 260 abused, neglected or financially exploited

seniors in LTC facilities are 10 - 20 abused, neglected or financially exploited

> reports of abuse, neglect or **5** exploitation are filed for seniors in the community

report of abuse, neglect or 1 exploitation are filed for seniors in LTC facilities

- It is difficult to measure the true prevalence of family violence; many victims never come to the attention of authorities.
- Reports to local children's service agencies typically exceed the estimated number of abused or neglected children. This is likely due to multiple reports filed for a single child. Also, many children are placed in custody for reasons other than abuse or neglect (e.g., delinquency).
- n/a = figure not available because of missing data.
- Residents use domestic violence shelters in other counties.
- Elder abuse/neglect figures exclude self-neglect and victims <60 years old. (LTC = long term care)

This profile is part of an 88-county series provided by the Ohio Family Violence Prevention Project – a collaborative project of the Health Policy Institute of Ohio and the Ohio State University College of Public Health with support from the HealthPath Foundation of Ohio. For additional copies and a detailed description of how we calculated these figures, please visit: www.hpio.net/familyviolence

In Wyandot County, how does family violence compare to other threats among...?

teenage girls (age 15-19, est. #/year)

adult women (age 18+, est. #/year)

Seniors (age 60+, est. #/year)

• For example: each year in our county between 110 and 150 adult women experience physical intimate partner violence; in comparison, 59 adult women are injured in motor vehicle crashes.

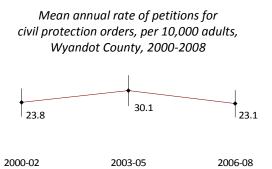

How do we compare to other counties?

	Wyandot County	Mean of 28 non-Appalachian rural counties	State mean
Civil protection order petitions (per 10,000 adults)	23.1	18.4	21.6
Reports of abuse, neglect or exploitation in LTC facilities (per 100 resident beds)		1.7	2.3

- Wyandot County has **about the same rate** of petitions for civil protection orders (CPO's) compared to similar counties in Ohio.
- Wyandot County has **too few cases** to calculate a rate of reports of abuse, neglect or exploitation in LTC facilities.
- Differences in data collection limit our ability to compare other indicators of family violence across counties.

Is family violence increasing?

It is hard to say. Some data sources suggest family violence increasing; others suggest it is stable decreasing. Within a county, changes over time are largely due to changes in victims' ability to access

services. This graph, for example, suggests no significant change in petitions for CPO's in our county. This trend could reflect no changes in the awareness or ability of victims to request CPO's. For a discussion of when differences are noteworthy, please see the introduction.
